

MIXEAT alieco presentation

2015

MIXEAT alieco's milestones

Hereby Alieco's history, about our past, our present development and our future. Please find the steps of our story, which has been model of reliability and confidence, in which you could continue to trust.

Marchese Bros - manufacturing of feeder-mixer wagons in Bolzano

- ✓ **Alimix** chopper and feeder-mixer-wagons
- ✓ **Terrastan** and **Florastan** mixing-equipment for earth substrates
- ✓ **Geo-Line** mixing equipment for biomass and composting
- ✓ **Marmix** Unifeed feeder-mixer-wagons with silage cutting device

MIXEAT alieco's milestones

During almost 40 years our efforts for assuring a constant increasing quality and innovation:

1967 starting-up manufacturing of first European feeder-mixer-wagons by Marchese Bros in Bolzano; beginning the year-long tradition of manufacturing and distribution under the trade-mark **ALIMIX** which was introduced in the best way in all specific interesting markets.

1979 the new trade-mark **MARMIX** suited the market-requirements, especially in the field of zootechnics with feeder-mixer-wagons equipped with silage cutter and self-propelled machines; in the field of industrial homogenization the interest was moved into floriculture, compost and biomass field.

MIXEAT alieco's milestones

2000 Recognizing the opportunities, dictated by the market, in the year two thousand, in autumn, **Storti SpA** from Verona acquired MARMIX srl, for the purpose of taking advantage of the strategic synergies in marketing and sales of the group.

The technical leadership of Marmix in Bolzano remained the forty-year-long experience of the Marchese family.

The greatly desired process of consolidation, taking into consideration strategic, technical and logistic matters, brought the group to face unexpected challenges and did not reach the expected results, especially in the specific MARMIX markets.

2005 Five years later the group from Verona announces a radical re-organization of his plans, which has brought to a dissociation of the factory in Bolzano.

In August 2005 Marchese and Storti families reached an agreement relating the acquisition of the obligations, connected with the selling of Marmix. As a result, according to this agreement, the factory in Bolzano, which previously belonged to Storti family, has been transferred again to the Marchese family, which is now the majority owner.

MIXEAT alieco's milestones

2012 The company leave a new important reorganization. Part of the Marchese Family leave the ownership of the share. In the meantime Enrico Storti came a part of the share.

The new shareholder decide to move ALIECO from Bolzano to Albaredo D'Adige Vr in a bigger plant. (4,500 sqm covered – area 11,000 sqm)

MIXEAT alieco's milestones

2015 ALIECO became a part of industrial group of Forigo Family as:

Agricultural Machinery for Land preparation, Horticulture.
Worldwide distribution

Ostiglia (Mantua) ITALY
www.forigo.it

Laser cutting, sheet metal work,
CNC Tools Machinery

Nogara (Verona) ITALY
www.silcasnc.net

MIXEAT alieco's milestones

From a strategic point of view the interesting assumptions of MIXEAT - Alieco will be the following:

- the deeply-rooted co-operation with the resellers;
- the decennial bonds with selected customers;
- the customers' requirements relating service and technical advice.

ALIMIX name is guarantee of reliability and security, which is strictly connected with the incomparable experience of the first producers of the feeder-mixer wagons in Europe.

ALIMIX in the zoo-technical field and **ECOSTAN** in the compost and biomass field will hold in the future strong positions as international trade-marks;
MIXEAT srl is an independent company and takes advantage of the forty-year-long experience, private investments of owners and the enlarged management of good staff.

ALIECO factory production

As seen in the history description of the company, MIXEAT - Alieco is keeping its tradition as Leader in the Livestock machine's production, machine's for compost production and other INDUSTRIAL application.

Thanks to the know-how acquired year by year, the quality specifications for the machines building, are always based on high quality level and the maximum security for the users is guaranteed.

Grazie per l'attenzione

The staff of specialist guarantee to all the customer the an perfect customization of the machine for their specific needed .

We would consider MIXEAT - Alieco like a TAILOR to who dresses the tailor-made products. Our employees and our supply chain have an big flexibility to maintain the best standard and quality.

ALIECO factory production

The MIXEAT - Alieco 's production is divided in 2 product line:

Machines for animals feeding
with Unifeed or TMR systems

Machines for compost production
arising from biomass and recyclable
waste

ALIECO factory production

Mixer feeder wagon driven by tractor with/without silage cutter, horizontal with

- 3 augers (picture), from 5 to 21 mc
- 2 augers, (picture), from 10 to 24 mc.

Vertical mixer feeder wagon with

- 1 or 2 augers always driven by tractor, from 8 to 24mc.

Automotive mixer feeder wagon vertical and horizontal , high technology machines that can satisfy farmers all over the world. “Factor” project, is an automotive mixer feeder wagon, with high quality and quantity performances used to optimize the Unifeed process in a modern farm either for milk and meat production breeding.

ALIECO factory production

Mixer for the compost process, that can mix organic garbage to optimize the fermentation process. This kind of machines can be placed in a complex systems or can be used as single installation.

They are built with stronger material and higher quality as the product they are going to work for, is quite difficult to be treated. We can have different solutions, stationary machines with Diesel or electrical motor, automotive machines with diesel motor or automotive machines that work with PTO tractor shaft. (picture)

ALIECO market in the world

MIXEAT - Alieco is working from longtime with following countries:

Italy, Germany, Switzerland, Austria, France, Holland, Russia, Belarus, Hungary, Czech Republic, Slovak Republic, Romania, Spain, Portugal, Greece, North-Africa, Slovenia, Turkey.

MIXEAT - Alieco has the experience to transfer Know-How in Belarus
AND

MIXEAT - Alieco are ready to discuss any kind of project to satisfy his customer

Thanks for your time !!
